PROFILE

Bilingual Junior Software Developer with a specialization in Mobile App Development, relocating to Europe in September 2026. Currently completing a Bachelor of Information Technology with hands-on experience in React Native, Swift, and TypeScript. Proven detail-oriented approach to building cross-platform solutions and native mobile applications. Proficient in bridging the gap between complex technical logic (C#, C++, SQL) and user-focused design. Enthusiastic about joining a professional engineering team in Finland or Germany to deliver scalable, high-quality mobile and web products.

PROJECT EXPERIENCE

TaskMaster — Mobile Productivity App (React Native / Expo)

github.com/schottenius03/just-a-sec

- Developed a cross-platform mobile task manager using React Native and TypeScript, designed to streamline daily organization through a minimalist and intuitive interface.
- Implemented local data persistence using AsyncStorage and integrated a real-time search algorithm to ensure efficient task retrieval and a seamless offline experience.
- Focused on type-safety and scalable architecture, delivering a high-performance UI with custom styling and a clear focus on user productivity.

Just A Sec — Timer Application (Java / GUI)

github.com/schottenius03/just-a-sec

- Developed a desktop timer application in Java, allowing users to set and manage countdown timers with a simple and intuitive interface.
- Implemented event-driven programming and GUI components to handle user input, timing logic, and real-time updates.
- Focused on usability and clean code structure, ensuring responsive interaction and reliable timer functionality from start to completion.

CraftRunner — Android Mobile App (Java / Firebase)

github.com/schottenius03/craft-runner

- Developed CraftRunner, an Android app that helps users keep track of craft supply prices with a simple, user-friendly interface and Firebase authentication for secure access.
- Built core app functionality in Java with Android Jetpack components, including UI design, navigation, and data presentation in a clean and intuitive layout.
- Gained hands-on experience in mobile app structure, user login integration, and responsive UX, delivering a polished and fully functional project from concept to completion.

Other Technical Projects

- **AITR Connect (C# & MS SQL Server):** Data-driven application featuring secure student and course management with robust database integration.
- **AIT Library (C#):** Library management system using OOP principles for inventory and data manipulation.
- **ATM Simulation (Java):** GUI-based banking application focusing on Abstract Data Types (ADTs) and event handling.
- **Hangman Game (C++):** Console-based game utilizing pointers and classes to manage game state and logic.
- **Pawdience (HTML/CSS):** Responsive web platform with modular CSS and mobile-first design practices.
- **NetOnMail (Python/Flask):** Final-year web project from Nacka Gymnasium focusing on backend integration.

EDUCATION

Bachelor in Information Technology (Mobile App Development)

Academy of Interactive Technology, Sydney | 2023 – Aug 2026 (Expected)

- **Core Competencies:** Mobile Development (iOS, Android, Cross-Platform), Advanced Web, Software Engineering, Systems Analysis & Design.
- **Technical Breadth:** Java, Data Driven Apps, Database Design, Game Scripting, Enterprise Systems, Networks.
- **Methodology:** Extensive experience working in Scrum and Agile workflows during collaborative group projects, focusing on digital project management and version control (Git).

Higher Education Diploma in Information and Media Technology

Nacka Gymnasium, Stockholm | 2019 – 2023

- **Focus:** Software development and web technologies.

WORK EXPERIENCE

All-rounder | Café Bones, Sydney | 2023 – 2024

- Handled customer service, cash management, and operations in a fast-paced environment.

Dog Walking | Tassevärld, Stockholm | 2022 – 2023

- Managed client communication, scheduling, and responsible care for various clients.

Office/Administration | Jobbtorg, Stockholm | 2020

- Provided administrative support, participant onboarding, and marketing assistance.
